

Course structure

You must complete eight (8) units to gain the Advanced Diploma of Agribusiness Management.

- a minimum of six (6) units must come from the elective units list
- a maximum of two (2) units may be selected from the elective units or units aligned to Diploma or Advanced Diploma in AHC or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in agricultural management.

For full packaging rules see <http://training.gov.au/Training/Details/AHC60316>

ELECTIVE UNITS

AHCBUS608 Manage risk

AHCAGB603 Manage the production system

AHCAGB604 Analyse business performance

AHCAGB605 Manage business capital

AHCAGB602 Manage estate planning

AHCBUS605 Manage human resources

AHCAGB502 Plan and manage infrastructure requirements

AHCAGB501 Develop climate risk management strategies

Please note a maximum of two (2) units may be selected from the Diploma of Agriculture for the Advanced Diploma of Agribusiness Management (AHC60316). See our [Diploma of Agriculture course guide](#) for additional elective options.

ELECTIVE SUBJECTS

AHCBUS608 Manage risk

In this subject you will:

- determine the scope for risk management
- identify potential risks associated with climate, resource (natural, physical, financial and human) availability and capacity, enterprise production systems, theft and vandalism of assets, scientific and technological development, marketing, and external political and social factors
- implement strategies to minimise the impact of risk.

AHCAGB603 Manage the production system

In this subject you will:

- align relevant production systems with the enterprise strategic plan
- adjust production systems to meet the overarching sustainability requirements for the enterprise
- adopt a systemised approach to the incorporation of productions systems into the business plan.

AHCAGB604 Analyse business performance

In this subject you will:

- analyse financial reports
- use financial analysis tools
- identify profit drivers for the enterprise
- benchmark business performance against other businesses
- develop strategies for improving business performance.

AHCAGB605 Manage business capital

In this subject you will:

- assess capital needs
- assess appropriate equity levels for a business
- establish and maintain appropriate financing arrangements
- review the mix of liabilities
- monitor key indicators of financial returns for the business.

AHCAGB602 Manage estate planning

In this subject you will:

- identify estate planning requirements
- separate personal goals from enterprise goals
- consider investment, financial and retirement options.
- clarify estate planning arrangements
- clarify and mediate apparent inequities in estate distribution with relevant parties where necessary
- define agreements and contracts
- implement estate planning.

AHCBUS605 Manage human resources

In this subject you will:

- implement strategies for personal development and appropriate self-management
- identify skill requirements and prepare task descriptions
- arrange employment of workforce members
- support career and professional development of workforce members
- implement WHS priorities and procedures
- manage administration of staff records
- review labour productivity.

AHCAGB502 Plan and manage infrastructure requirements

In this subject you will:

- identify infrastructure requirements for the enterprise
- interpret, analyse and extract information from a range of sources
- identify, build and use network and support groups
- recognise potential opportunities to use or install more environmentally efficient systems or equipment
- source, construct and modify infrastructure to meet enterprise requirements
- develop an infrastructure maintenance program including scheduling and responsibilities
- establish a recording system for infrastructure purchase, construction and maintenance
- implement enterprise work health and safety policies
- implement enterprise sustainability practices.

AHCAGB501 Develop climate risk management strategies

In this subject you will develop a climate risk management plan. This will include:

- research, analyse and interpret climate and enterprise data
- prepare risk management strategies
- integrate climate risk and opportunities for management strategies at a business management level
- implement enterprise sustainability policies.
