

Exploring Beyond *fossil* Diesel 7

Online Webinar: May 16

Time: 12:30 pm – 2:00 pm (Sydney Time)

Over 80% of agricultural energy is supplied by diesel fuel

Explore: **Power to X (P2X)**

Combining green hydrogen with carbon to make renewable fuels and with air and water to make fertilisers

Register for this **FREE** event:

EVENT DETAILS

Rose Amal , UNSW Scientia Professor of Chemical Engineering (and hydrogen expert) will discuss:

- Renewable/ synthetic fuel production pathways - How it is made by P2X
- Making Fertiliser from P2X
- Opportunities for agriculture
- When it is coming and Cost
- NSW Farmers (ex President James Jackson) will provide Ag insights on the discussion
