

Biosecurity Emergency Response training Australia (BERTA)

BERTA is the nationally standardised training program. It is aligned to nationally accredited qualifications, and has been developed to ensure that personnel across all jurisdictions have similar skill sets and are able to respond effectively to biosecurity emergencies. It has been developed by the Registered Training Organisation and training partner Tocal College and jointly funded by the Commonwealth, states and territories.

Information about the qualifications, skill sets and their delivery are shown in the table below.
